Canadians Show Class Against Leafs

Brilliant Play By Entire Team Arouses Wild Enthusiasm of Supporters. Leafs Here Again Monday

Canadians 4, Lethbridge 2. That tells the story. Canadians took Leafs into camp for the first time this season and missed a shut-out by an eyelash. Two minutes to go, the score stood 4-0; a minute later it read 4-2. It was that kind of a game. Speed and more speed, thrill after thrill.

Last week it was stated that Coleman was slow. It has to be taken back. On their performance Tuesday evening Canadians proved they had enough speed to skate alongside the speediest team in the league. Jemson, playing his first game, sold himself to the fans. His goal was a beauty and showed the value of taking advantage of every break. Perhaps his presence in uniform among the players caused them to outplay the Leafs; whatever the cause they really went to town.

Reason for Coleman's success lies mainly in its two well balanced lines. The Fraser brothers and Lopichuk are working well together, while Ainsworth, Jemson and Jenkins are good, the latter line picking up five points against Leafs. Kemp, the best goalkeeper in the league, and the defence are being ably assisted in their work by two sets of backchecking forwards.

Young, in Tuesday night's game, was a standout performer as he stopped shot after shot which were right on the net. Had it not been for him, Leafs would have suffered a much greater defeat. Leafs have two fast forward lines who work hard until the final whistle.

Lethbridge will be back on Monday night determined to erase their defeat. This rivalry between the two teams and the brilliant games which they play has resulted in the box office

receipts taking an upward swing. 1200 at the last game; let's have more on Monday evening.

With Canadians presence in the Kootenay league, Coleman is becoming an important centre for hockey news coverage. Two Calgary papers as well as the Lethbridge are faithfully served by local correspondents. The Canadian Press now takes wires on local games for coverage in the Kootenay district as well as flashing the scores to larger papers. Last Tuesday radio station C.J.O.C. Lethbridge, asked for and received period by period results and the goalscorers. So important were the results considered that the local night operator was allowed to send in his messages direct to Lethbridge instead of having to send them via Calgary as is customary.

Change in Attack Major Point in Canadians' Win Against Trail

It was a proud aggregation of hockey players that skated off the ice on Friday evening when Canadians trimmed the high-flying Trail Smoke Eaters. Canadians played a winning game and deserved their victory. All players made a fine showing, Jim Fraser showing real effectiveness on the forward line with W. Fraser and Lopichuk. It was noticeable that Canadians changed their style of attack against Trail. Bill Fraser refused to come outside the Trail zone while the puck was still there and harassed Trail the entire evening, which ultimately resulted in Coleman taking an edge in play and a 2-1 decision.

Canadians can be proud of the manner in which they backchecked their opponents. More of this style of hockey and Coleman fans will again be visualizing play-off games in the arena next spring.

Rossland Here Friday

Rossland Miners will appear here Friday evening for their first and probably last appearance here this season. Official announcement has been made that due to lack of support Rossland will drop out of the league. They were however obligated to make one trip around the circuit due to the Alberta teams and Kimberley giving them a home game.

Rossland boasts of a young team who hold victories over both Lethbridge and Coleman. It is expected they will make every effort to win over the Alberta teams before making their exit from the league.

Acknowledgments

The Journal acknowledges renewal subscription of Hugh C. Craig, former superintendent of the power plant at Crows Nest Lake. Mr. and Mrs. Craig are at present living in Macleod.

A Christmas souvenir is also acknowledged from Mr. and Mrs. Brown, of Suxxex, England, parents of Express Agent George A. Brown, who visited here for several months during 1936.

Mr. J. M. Allan will attend the convention of Associated Grocers at Calgary next week.

Introducing Myself....

As a Salesman of the Power of Journal Advertising

Illustrations such as the above convey more to the eye than words occupying many times the amount of space of this cut.

Quality always impresses prospective buyers, and advertising appeal through the columns of this paper is second to none.

Why not take advantage of The Journal advertising service to cultivate increased volume of business and customer goodwill?

Regular Meeting of School Board

A regular meeting of the school trustees was held Wednesday evening in the board room in the high school. Present were Chairman Fraser, Trustees Greenhalgh, Fleming and Sharp.

Due to the present unsatisfactory method of inspecting truancy cases, the board appointed Jules Ancelot as truancy officer. He will be held responsible for investigating all truancy cases at Central school and will send in his report each month to Edmonton. The Cameron school janitor will investigate all truancy cases at that school, turning in his report to Ancelot.

Principal Hoyle gave his report, which stated everything was going smoothly, attendance being exceptionally high.

Chairman Fraser requested Principal Hoyle to instruct all public school teachers to warn their pupils from running wild over school property. The sheds beside the vacant janitor's house has become a favorite place of entertainment for the children, and it is to prevent them falling from the roofs and injuring themselves that this warning is to be

made. Mr. James Ford had been granted three months leave of absence at a previous special meeting. Miss Gladys Lees was appointed secretary during Mr. Ford's absence and will be bonded.

E. D. Battrum will be returning officer for the forthcoming election in February when two vacancies will be filled on the board. H. Snowdon and A. E. Knowles were appointed deputy returning officers.

A grant of \$50 was voted to the hockey club to help cover expenses involved in giving the children free skating three nights a week.

The books for 1937 were declared closed and the financial statement authorized published in The Journal.

Accounts were examined and authorized paid.

An insurance policy was ordered changed from the present company and placed with another company. Should A. M. Morrison be unable to place this insurance within a stated time, the insurance would be placed

(Continued on Back Page)

Six Entries From Local Club---Large Outside Entry Expected

Progress!

THIS AGE is a progressive one; in every sphere of human activity men are striving feverishly to get ahead and the community which does not go ahead is fairly sure to get left very far behind in the race.

Progress means leaving the old behind and reaching out eagerly to the promise of the future. But it must also mean improvement; if it does not mean this it is not progress. Movement without advance is futile and may even be retrograde. Keep moving, and be sure you are moving forward.

The Dog Round-Up

Soon dog owners will be called on to purchase new license tags for their dogs, and those dogs whose owners do not pay the tax or which appear to be just strays will be quietly put out of the way. The town police will keep a keen eye open for derelict and non-licensed dogs.

If all dog owners would exercise proper care of their pets, there would be little cause for complaint. But apparently many consider that paying a dog license ends their responsibility as far as caring for a dog is concerned. It is allowed to run at large, annoy neighbors at all hours of the night and pick up its grub from any dirty old scrap pile. There should be a law that if a person does not exercise proper supervision of his dog, it should be done away with. It would be a merciful act to the dog in many cases, and would bring relief to those who suffer annoyance from nightly howls and barking. If a dog is worth having, he is worthy of proper care. Give him a shelter and a bed at night instead of letting him prowling the streets. Above all, do not permit him to become a general nuisance. It is the owner who is to blame, and it is his responsibility.

Hillcrest Trim Excel 6-4 in League Game

Hillcrest took a 6-4 decision from Excels here on Wednesday night before a very poor crowd of fans. Coleman had a 4-1 lead at one stage of the game but failed to hold it, mainly through the efforts of Elick who scored five of his team's goals.

D'Appolonia, local defence man, suffered a broken collarbone within a few minutes of the start. This is the second fracture suffered by D'Appolonia this winter. His collar bone was fractured at the start of the winter season and he had only recently discarded his bandages.

Winners of the turkey draw held last week in aid of funds for the Protestant home for children were: H. Templeman, R. Horn, H. Pinkerton, H. McVivar, J. Bowie, J. Sutherland, F. Bennington, Mrs. Hogan, 95A St.; Mrs. Verral, 106 Ave.; E. Wilkinson, J. Walker, Mrs. J. Cameron, Mr. Patry, 89th St.; W. Duncan, Vermillion; Mrs. E. Rispin, R. Morton, J. Dale, Marwayne, Miss Dorothy Dawes, Miss Mable Benham, Mrs. J. Meridith, Mrs. A. Nestor, Mrs. A. Rider, Lethbridge; D. Hughes and J. Faltinson.

Followers of the roarin' game will have their innings next week when the C.N.P. bonspiel gets underway. Six rinks are entered by Coleman and it is expected a number of the old faithfuls such as Bill Kerr, Lance Morgan, Milt Congdon, of Blairmore; H. Greenway of Lethbridge, and Allison of Pincher Creek will be on hand.

Fees were set at \$3 per man for local entries and \$1.50 for outside entries. Should there be an entry list of over 25 rinks, Blairmore have given their consent for the 'spiel committee to use their three sheets of ice until the draw can be accommodated on the local sheets. The above fee includes admission to the banquet at the Grand Union on Wednesday evening.

A survey of the local hotels reveals all four rooms vacant at the present time and it is doubtful if they will be held until the end of the week when the visiting curlers are expected to arrive. The only alternative will be to accommodate them at the Blairmore hotels and find means of transporting them back and forth from hotel to arena.

A ruling was made Sunday by the local club that all old members who desire to compete in the bonspiel and are clear of any indebtedness to the club may do so. L. S. Herchmer, association secretary, will be on deck, on Sunday afternoon, and with the aid of President Sam Moores, will make the draw. The games are expected to get underway at 9 a.m. Monday.

Pincher Trim Excel 3-2

Coleman Excels lost their third successive game on Saturday evening when they travelled to Pincher Creek and absorbed a 3-2 trimming. Coleman, by their record are too pugnacious on the ice and are losing too many games as a result. Last week they lost two men when Fleming and Pavlus were suspended by the league for one and two games respectively. On Saturday evening it is reported Fred Brown got into a scrap with an opponent. Fighting is getting them nowhere.

If the players have any grievances against a referee or player they have team officials who are in a position to make representation to the league officials on those grievances. Just starting a scrap to avenge themselves won't get them anywhere and it results in the team being penalized as well, as can easily be seen by the score board in the last three games.

WEDDINGS

Kwasnie - McDonald

An interesting wedding took place at the Anglican church, Coleman, on Friday, Jan. 7, at 5 p.m., when Lillian McDonald, daughter of Mrs. J. A. McDonald, and the late Mr. McDonald of Blairmore, became the bride of Mr. John Kwasnie of Trail, eldest son of Mr. and Mrs. Joe Kwasnie of Coleman. Rev. A. S. Partington officiated.

Attendants were Miss Kathleen McDonald, sister of the bride, and Mr. Jack Irvine, of Blairmore. The happy couple will spend a short honeymoon at Victoria, returning to Trail where Mr. Kwasnie is employed.

The report of St. Alban's parishioners annual meeting is held over till next week.

Britain Will Resist Japanese Demands For Control Of Shanghai

London.—Great Britain has determined to resist sternly Japanese demands for virtual control of Shanghai and to discuss with the United States and France concerted steps to safeguard interests of western nations in China, a high government source said.

Prime Minister Chamberlain, this source said, would return to London from Chequers, his country home, to assume personal command of a British program to curb Japan's expanding power in the far east.

The prime minister was reported prepared to draft a strongly-worded protest to Tokyo on recent handling of British settlement problems in Shanghai by Japanese troops.

An early reply to Japan's demand for a dominant share in administration of Shanghai, China's greatest port, and full authority over customs and communications was not expected. The Japanese demand was made to the Shanghai municipal authorities last week.

Foreign office quarters emphasized Britain would act only in harmony with France and the United States and that the future of the western investment in the Orient would be considered jointly with the Shanghai problem.

Responsible quarters held Japan not only had failed to prove her promise to control Japanese militarists, but neglected to satisfy Great Britain on these three points.

1. What specific action is being taken against the officers responsible for the attack on the British gunboat Laydon and other shellings.

2. What is being done about the British request for safety zones for neutral shipping.

3. What action is being taken by Japan to guard against further violation of territorial waters along Hong Kong.

The Japanese political demands at Shanghai, and the series of attacks on foreign individuals and property, are interpreted in some quarters here as deliberate moves in an effort to obtain complete control of Chinese territory.

Vanguard Oats

New Rust-Resistant Variety Has Made Remarkable Showing

Winnipeg.—Vanguard oats, new rust-resistant variety bred at the Dominion rust laboratory here by Dr. C. H. Goulden, has made a remarkable showing in the last two years the plant breeder said.

Vanguard oats, which came from a cross between Banner and Hajira varieties, is three to four days earlier than Banner, has a longer straw, lower percentage of hull on the seed and is also moderately resistant to smut, Dr. Goulden said.

It was tested at 20 stations in Manitoba against Banner, Anthony and Gopher varieties and topped them in the tests.

Cost Has Been Heavy

England Pays Large Sum In Compensation For Cattle Destroyed

London.—Foot and mouth disease among cattle cost the United Kingdom government £75,385 (£376,925) in compensation to owners for animals destroyed during the last two weeks of December, according to figures published in the London Gazette.

During the period 7,568 affected animals were slaughtered, compared with 456 in the last fortnight of 1936.

Tribute To Dr. Wheeler

Veteran Agriculturist Is Honored At A Dinner At Rosheim

Rosheim.—Dr. Seager Wheeler probably accompanied more than other agriculturists in the world, said Dr. L. E. Kirk, dean of the College of Agriculture at the University of Saskatchewan, at a dinner tendered to the veteran agriculturist at Rosheim.

Dr. Kirk joined citizens of Rosheim and district and prominent men of the province in paying tribute to Dr. Wheeler and his work on the occasion of his 75th birthday. Among others attending were the Hon. J. G. Taggart, minister of agriculture, and Walter A. Tucker, M.P.

Reference was made by the speakers to the invaluable work Dr. Wheeler had done not only in growing prize grains but in the development of various strains of grain and his horticultural experiments.

Mr. Taggart cited the attitude of Dr. Wheeler as an example of the determination of western farmers. He was convinced that westerners had not lost their morale, that in spite of all statements to the contrary it would not be necessary to abandon more than 10 per cent. of the cultivated land in the province and that there would be a return of good crop years.

A presentation was made to Dr. Wheeler by R. S. Fleury on behalf of the citizens of the district who have watched for years the work of the agriculturist on his farm near Rosheim.

Visibly moved by the tributes paid to him, Dr. Wheeler replied and recounted the difficulties experienced by his family when they moved to Canada and the now well-known story of his early grain growing efforts.

Air Force Casualties

Said London To Inexperienced Youthful Pilots And Lack Of Instruments

London.—The high casualty toll in Royal Air Force accidents during 1937 was due to inexperienced youthful pilots and an inadequate supply of navigation instruments, Air Marshal H. G. S. Mitchell declared.

Speaking to the Royal United Service Institute, he said aviation authorities were greatly concerned over the increase in air accidents last year, which totalled 93 crashes with 153 deaths, as compared to 96 deaths in 1936.

He expressed confidence, however, 1938 would see a great improvement. Greater production would furnish a sufficient supply of necessary instruments, and pilots would receive more intensive training.

More Railway Equipment

C.P.R. To Spend Ten Million Dollars For New Freight Cars

Montreal.—Part of a \$10,000,000 equipment program, covering different types of freight cars, was announced here by Canadian Pacific Railway.

Tenders have been called, officials said, for 2,000, 40-ton steel-sheathed box cars, 200 twin-hopper cars of 100,000 pounds capacity, 200 4-foot, eight-inch steel underframe cars, 200 16-foot flat cars and 100 low-side drop-end gondola cars of 150,000 pounds capacity.

In addition to the \$10,000,000 program, tenders also had been called for 15 Hudson-type locomotives, with the possibility of similar orders later.

Trouble In Palestine

Terrorist Attacks Reported On Buses In The Holy Land

Jerusalem.—Coincident with London's announcement a new commission of inquiry will be sent to Palestine, terrorist snipers resumed attacks on buses plying principal traffic arteries of the Holy Land.

Unidentified assailants fired on a bus speeding along the Jerusalem-Jaffa road, wounding a Jewish policeman in the bus.

British police, with troops of the Black Watch, went to the spot to search for the aggressors.

Automobiles and buses plying the Hebron-Jerusalem road and the Haifa region underwent fire of hidden snipers. One traveller was wounded in the Haifa zone.

Bullets hit a railroad train proceeding from Lydda to Jerusalem, but no casualties were inflicted.

Refusal of some wealthy residents of the Hebron region to pay their part of a £2,750 (£13,750) collective fine imposed on charges it abetted terrorist activities, has resulted in despatch of troops and armoured cars to the region to maintain order.

Many of the residents left Hebron to evade payment of the levy.

Plan Has Been Success

Home Improvement Loans Reached \$12,850,000 On December 31

Ottawa.—Loans under the home improvement plan had reached \$12,850,000, divided among 32,946 borrowers, on Dec. 31, according to figures issued by Finance Minister Dunning. Of these, 1,712 loans amounting to \$676,882 were negotiated since Dec. 10, when the last report was issued. All provinces shared in the loans made during that period.

The plan has been in operation since November, 1936. It was launched by the government in co-operation with the banks and envisioned a home improvement program amounting to \$50,000,000 with the federal treasury guaranteeing the banks against losses up to 15 per cent. of that total.

Ontario led all the provinces with 13,355 loans for a total of \$5,588,000.

Explosion Causes Fire

Plant Of Supply Company In Fort William Partially Destroyed

Fort William.—Preceded by several violent explosions that shattered windows for blocks, fire partially destroyed the plant of the Northern Engineering and Supply Company.

Firmen battled the blaze in night cold that touched 22 degrees below zero, while tenants of adjacent blocks, huddling to the streets in thin night attire, were given shelter in nearby hotels. Destruction of the warehouse and stock will bring the loss to about \$150,000.

Cause of the fire remained undetermined. It is presumed a steam boiler blew up, causing the first explosion. The series of blasts that followed probably originated among acetylene tanks stored in the warehouse, said the owners.

Canadian Pilot Killed

Stoke-Oil-Trent.—Stiffordshire.—A Flying Pilot Officer T. G. Clitheroe, 24, believed to be from Toronto, was killed when he crashed near here. Clitheroe, piloting a Royal Air Force training machine, made a direct entry to the R.A.F. from Canada last year and had been stationed at Ternhill airbase.

DEPLORES NEW CONSTITUTION

Viscount Craigavon, Prime Minister of Northern Ireland, who deplored "the affront to His Majesty involved in that Constitution" which de Valera drafted to make "Ireland" a republic, and which became law recently.

Air Mail Problems

Departmental Delegation Going To Washington To Discuss Matter

Ottawa.—Col. V. I. Smart, deputy minister of transport; J. A. Wilson, director of civil aviation; Lieut. Commander C. P. Edwards, chief of air services; and C. P. Cowley, of the department of trade and commerce, are leaving for Washington, D.C., to discuss with officials of the United States department of commerce international air mail and passenger arrangements between Canada and the United States.

Chief problems to be dealt with are questions of joint operations between Montreal and New York, between Toronto and eastern United States cities, Winnipeg and Pembina, Winnipeg and Chicago, Lethbridge and Great Falls, Mont. and Seattle and Vancouver. American lines already are operating between Montreal and New York, Winnipeg and Pembina, Seattle and Vancouver. The Canadians want entry into Chicago and from Lethbridge to Great Falls to establish a northern route on to Calgary, Edmonton, Peace River, the Yukon and Alaska. The whole question of establishing such connections, together with regulations for the air mail and passenger traffic will be discussed.

Increase In Revenue

Collections From Income Tax And Customs Considerably Higher

Ottawa.—National revenue figures released by Revenue Minister J. L. Halsey show that net collections from customs, excise and income tax for the nine-month period, April 1 to Dec. 31, 1937, were \$259,219,270. This compares with \$238,159,815 collected during the corresponding period of 1936, a net gain of \$61,159,455.

Income tax revenue climbed to \$107,260,833 for the first nine months of this fiscal year, a net gain of \$15,790,692 over the same period of 1936.

Protest Made Against Japanese Attack On British Soldiers

London. News that two British members of the Shanghai international police force were beaten by Japanese soldiers in Shanghai was played up in London newspapers.

Official quarters remained silent pending receipt of complete information from British diplomatic representatives in the Far East.

The Daily Mail (independent), editorially said:

"Japanese soldiers not being restrained from these deliberate outrages, will have a further irritant effect upon relations between Japan and the powers already affected by Japanese actions in Shanghai."

"The Japanese government remains responsible for incidents which cannot be tolerated by other nations."

The Herald (Labor) which gave front-page play to a story on Labor's anti-Japanese meeting when a statement was issued urging Britain to refrain from purchasing Japanese products, urged in an editorial the imposition of "economic restraints" upon Japan.

"Labor asks that peaceful governments should at once discuss ways and means of withdrawing from Japan the means of war which they directly and indirectly now provide," the Herald continued.

Shanghai. Major-General A. P. D. Telfer-Smollett, commanding British troops at Shanghai, protested against an attack by Japanese soldiers on municipal police, and was reported to have warned the Japanese military that repetition might result in the gravest consequences.

Inspector F. G. West, one of the officers reported the incident to police headquarters. His version was: Sergeant A. R. Turner, watching Japanese police search Chinese peddlers near the British-Japanese line, remarked that the peddlers were receiving un-necessarily rough treatment.

A Japanese policeman resented the remark, struck Turner in the nose, and declared: "It's none of your damned business."

Several Japanese soldiers then rushed across the line and attacked Turner with their fists. The inspector rushed to his aid. The soldiers struck him too.

British Inspector George Bennett suffered similar treatment at the hands of Japanese last week when he went to Japanese naval head-

quarters to request an explanation for a traffic mishap.

Chinese and Japanese troops prepared to fight for control of the eastern section of the Lunghai railway, China's main east-west trunk line.

Chinese asserted they had about 100,000 men along the line in northern Kiangsu and eastern Hunan provinces, between Suichow, 175 miles northwest of Nanking, and Kweichow, 80 miles to the west. Japanese forces numbering 60,000 were thrusting at the line from both the north and the south. The column fighting north from Nanking still had 80 miles to go and invaders driving south in Shantung province were 100 miles from Suichow.

Control of the Lunghai railway would give Japanese a base for a push westward to the Peking-Hankow railway, and thence southward 300 miles to Hankow, one of China's temporary capitals.

A new highway linking Canton, South China, metropolis, with Hong Kong, British crown colony, is now opened to traffic. First to arrive here on the new road were two cars covered with large Union Jacks as a precaution against Japanese air raids.

French Aviatix Rescued

Forced Down In Persia And Guarded By Bedouin Tribesmen

Basra, Iraq.—Marsy-Hilaz, French aviatix, whose plane was damaged when she was forced down by storms in Southern Iran (Persia), reached Basra, Iraq, safely with an escort of Bedouin tribesmen after a two-day desert trek.

The flyer left Karachi, India, recently in continuation of an attempt to break the Saigon-Paris record. When her plane was unreported after being seen over Basra, near the Straits of Ormuz, searching parties were sent out. She had landed unhurt at Karjony, about 45 miles from Basra.

Freezing Weather In Italy

Venice.—Firmen mending ice-breakers kept the Venetian canals from freezing over. The coldest map in years threatened to disrupt Venice communications in below freezing weather felt throughout northern Italy.

Garnet Wheat Will Be Eliminated From Higher Classifications

Winnipeg.—Garnet wheat will be eliminated from the higher northern spring wheat classifications and graded separately, according to a proposal soon to go before parliament. The move likely will aid the sale of the popular western variety, said E. B. Ramsay, chief commissioner of the board of grain commissioners, in Winnipeg.

Garnet is a different variety and should not be listed with other northern grades, Mr. Ramsay believes. The proposal means a new grade 3 C.W. Garnet will be set up, in addition to the present 1 and 2 C.W. Garnet.

Hon. W. D. Euler, fed. minister of trade and commerce, announced in December legislation would be introduced soon to remove Garnet wheat from 3 Northern grading.

Controversies over Garnet's grading in the higher northern ratings have occupied the agricultural committee of the House of Commons for years. In 1934 separate grades were established for 1 and 2 C.W. Garnet, but the way was left open for Garnet to grade No. 3 Northern, providing it reached the standard for the grade.

Millers overseas have purchased No. 3 Northern though it contained a varying percentage of Garnet, but there is evidence, grain men say, they would prefer Garnet to be sold separately.

Customers must be satisfied and on this basis the change is suggested, Mr. Ramsay believes. Millers abroad have used Garnet wheat in considerable quantities, so Mr. Ramsay draws the conclusion "Garnet will be well able to stand on its own feet."

Garnet, next to Marquis, is the most widely used variety in the prairie provinces, a recent survey indicated. In a history of Garnet published by S. R. Grain Company, it was estimated 25,553,000 acres were sown with Garnet in 1936 and occupied 22.4 per cent. of the Alberta acreage; 8.5 per cent in Saskatchewan and two per cent in Manitoba.

Producers in northern Alberta and northern Saskatchewan were attracted to Garnet through its early maturing qualities and high yield.

Defence Estimates Have Not Yet Been Considered By Cabinet

Ottawa.—Estimates for the defence department, to be submitted at the session of parliament opening Jan. 27, have not been considered by the cabinet, it was learned definitely.

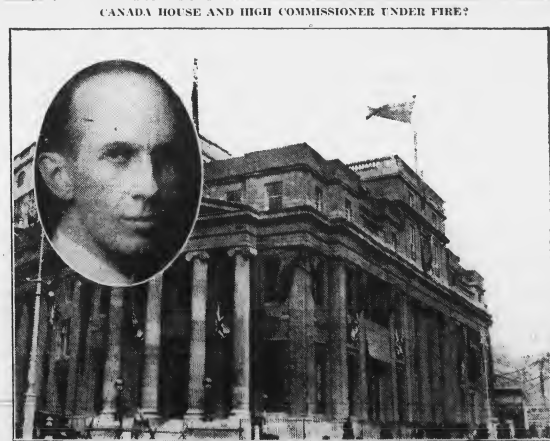

At the same time, it was learned in official circles that reports of understanding between Canada and the United States on defence plans were unfounded.

Defence estimates last year totalled \$35,000,000 and a considerable proportion may be revised this year because of the inability of the department to purchase equipment. Armament plants were working to

capacity all year and Canada's orders could not be filled.

It was reported in Toronto the United States might build forts along the Canadian-American boundary to guard against invasion through Canadian territory, unless Canada took adequate coastal defence measures.

Government officials here, however, declined to discuss the report beyond recalling Defence Minister MacKenzie already had announced elaborate additions and improvements to coastal fortifications at Esquimaux, Vancouver and York Island on the Pacific.

CANADA HOUSE AND HIGH COMMISSIONER UNDER FIRE?

Reports from Ottawa state that the "administration of Canada House in London is to be the subject of strong criticism in the House of Commons at the coming session of Parliament. Liberal members, particularly, are incensed over the lack of attention and 'scant courtesy' accorded them this year." The High Commissioner, Hon. Vincent Massey (inel) and his staff had a strenuous time during the Coronation, particularly with so many visitors from all parts of Canada, but some of the members are reported to have registered strong complaints about the accommodation and other matters.

NOTES AND COMMENTS

PROPAGANDA, reams of it, flows through the mails to newspaper offices. An enterprising gent gets a job as a publicity man, either for a corporation, a movie actor or actress, or for a government. He is paid a good salary, and usually writes a lot of piffle which cannot be classed as news. It is written to boost the particular cause for which he works.

ONE OF the first avenues sought for getting this publicity before the public is the newspapers. If the radio is used, which is seldom, time is paid for. But by some kink in the mind of a publicity man, newspapers are looked on as lawful prey to print the stuff free.

THE FIRST thought that strikes the writer when publicity material from any source is received, is that someone is being paid to produce and distribute it. On that account we also demand that we be paid for printing it, for typesetters do not set it for nothing, neither is the share of the cost of overhead, and other labor costs entailed in its production met out of thin air.

THE Social Credit Bureau is one of the offenders in sending out this class of publicity. We have perused it; it is straight propaganda for which a former weekly newspaper editor favorable to Social Credit is paid \$5000 to carry on the work of his bureau. The much maligned newspapers which Premier Aberhart would control are asked to publish this stuff without cost to the government. Was there ever such a presumptuous and nery request? Every newspaper receives sufficient free publicity material every week to make a big bonfire. A publisher who wishes to pay his bills cannot afford to use such stuff. He has to receive a return on his production to pay the wages and all the other costs entering into publishing a newspaper.

SHORTLY there will be municipal elections here. Vacancies caused by time expirations of councillors and school trustees terms will require to be filled. During the past two years the council has carried on the best administration the town has seen. There have been more improvements made and the money has been spent wisely instead of being frittered away on non-permanent work. Relief costs have been carefully watched, so that the ratepayers would not be subjected to relief being worked as a racket for which the working ratepayers must pay. Tax collections during the past year were only \$384.59 short of the 1937 town tax levy. The council's deliberations have been carried out in harmony and in the best interests of the ratepayers. If the present councillors could be prevailed upon to stand for another term, it would appear to be good policy.

SCHOOL AFFAIRS appear to be working more smoothly than for some time. The building of the new high school provided much needed additional facilities and good use is being made of them. In fact, there appears to be very little of a controversial nature looming on the horizon, but this should not induce a feeling of indifference. Progress is not attained without effort, and at the same time a little appreciation should be expressed to those who undertake the responsibility of public office.

EVERY pleasure has its pain—so 'tis said. The fine weather of the first week of the year appears to confirm it. Colds and minor ailments make life very unpleasant for many and the common cold can do a lot of damage and cause the loss of innumerable hours of working time. Nature has its own inexorable way of balancing up the good with the bad.

FORECASTS of provincial legislation to be attempted at the next session in Edmonton indicates a desperate effort will be made to implement the extravagant promises made in 1935 by Premier Aberhart. Nearly two and a half years have passed and nothing has been accomplished towards the fulfilment of "the rapture" and dividends for all. Mr. Aberhart in his broadcasts continues to set up straw men so he can knock 'em down and thereby give the impression he is carrying on a great battle with unseen foes, of his imagination. He says he is pressing steadily forward and will not be thwarted. But surely after two and a half years there should be something definite accomplished. "Experts" are being paid big salaries, a Social Credit Board apparently is superior to the cabinet, heavy costs are being incurred to carry on propaganda for Social Credit at the public expense, and where is it leading to? The same old blind alley of futile effort and controversy. Will another insurrection break out in the forthcoming session?

OF COURSE, sanity and reason will prevail after the public realize that modern Utopias are just myths or figments of the imagination. Reward comes only from work and properly applied effort. Dreams may be pleasant to contemplate, but they bring nothing of a material nature.

TAX INCREASE PASSED ON?

It is often claimed that any increase in the tax load of oil is immediately passed by the producer to the consumer through the medium of increased price for gasoline.

The truth is that this is not possible for the great majority of oil operators. It is particularly untrue with respect to the independent operators. For example, the independent operators own more than 50 per cent of the production in Texas. Here the increased taxes in the past have been largely absorbed by the industry and more especially by the producer.

This is illustrated by the fact that in the Texas field gasoline now retails approximately at the same price it did 15 years ago when oil was selling at \$2.50 per barrel as compared with the average price in Texas today of \$1.20 a barrel.

The major part of these increases have been absorbed by the industry, but the ability to absorb has reached the irreducible minimum point. Any further substantial increases probably would be passed through economic necessity to the consumer. Were this done, the result would be an adverse effect upon consumptive demand, with loss of business and employment. —B-29.

Your Eyesight Is a Precious Asset--Guard It Well!

LIGHT RATES have been reduced substantially in the past few years.

A greater volume of electrical current is being used, indicating that business not only is developing but that more light is being used in homes.

It is poor economy to try your eyesight by not having sufficient light. It produces headaches and eyestrain which lead to permanent impairment of sight.

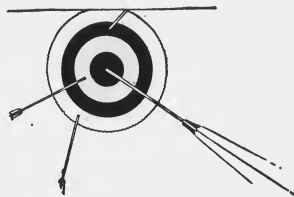

See that your home has plenty of light. Also stores can give imposing night displays in their windows by the use of more light. Make your windows pay dividends by well lighted window displays.

Hit The Bullseye with Forceful Advertising

THE MOST EFFECTIVE medium for local advertising is your local weekly newspaper. Many advertising propositions of a spasmodic nature are placed before merchants, such as directory cards, programs, registers, etc., with very limited circulation. The local community newspaper is eagerly looked for every week and merchants' advertising messages are read with as much interest as the news. They also have the appeal to customers because they are plainly printed in good typographic form, creating the impression which only the printed word can. By all means keep your business before the public by carrying a weekly advertisement in this family Journal, printed by Coleman workers experienced in their craft.

FOR SALE: 1929 Chev. Coach, good running order, new battery. Cheap for cash. Apply H. Parkinson, Sixth Street.

Merchants' advertising copy in The Journal will be in good company. It will be read and believed because it appears in The Journal.

Styling as different as it is beautiful, for this bigger-looking, better-looking Chevrolet.

Smooth—powerful—positive... the safe, self-energizing brakes for modern travel... giving maximum protection.

So safe—so comfortable—"the world's finest ride". On Master De Luxe Models.

Giving the most efficient combination of power, economy, dependability.

Larger interiors—lighter, brighter colors—and steel construction with safety glass for safety.

Eliminating drafts, smoke, windshield clouding and assuring each passenger individually controlled ventilation.

Easier, tip-toe-pressure clutch operation. Wear is greatly reduced. No lubrication required.

Elks Install Officers for 1938

Coleman lodge B. P. O. Elks, No. 117, held their installation of officers on Thursday, Jan. 6. D.D.G.E.R. Frank Barringham, assisted by P.E.R.'s Rushton and Jenkins installed the following officers.

I.P.E.R., Max Stigler; Exalted Ruler, Wm. E. Read; Leading Knight, Wilfred Dutil; Loyal Knight, Henry Tiberghien; Lecturing Knight, John Smith; Secretary, J. M. Chalmers; Treasurer, Robt. Bell; Inner Guard, Melville Cornett; Tyler, Frank Henriette; Esquire, Leslie Griffiths; Chaplain, Harry R. Cady; Trustees: 3 years, A. Webster; 2 years, J. M. Rushton; 1 year, Harry Antel.

Following the installation, D. D. Bro. Barringham presented a Past Exalted Ruler's jewel to Bro. Max Stigler, who expressed his thanks and appreciation. A lunch was served, followed by several members contributing to a short program.

One of the most useless expenditures of the Social Credit Board, Edmonton, is that of \$5000 per annum to a man named Allnutt to prepare mimeographed sheets of propaganda, which are sent to newspapers. Nearly all of the papers promptly drop it in the waste basket. There is a terrible waste of public funds going on under the present administration, to provide jobs for party heelers, and this is but one of them.

Notice to Creditors and Claimants

In the estate of Joseph Lysek late of the Town of Coleman, Alberta, Miner and Merchant, deceased.

Notice is hereby given that all persons having claims on the estate of the above named Joseph Lysek, who died on the 18th day of November 1937, are required to file with the undersigned solicitor for the Administratrix of the estate by the 21st day of February 1938, a full statement duly verified, of their claims and any securities held by them, and that after that date the Administratrix will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to her knowledge.

Dated this 13th day of January A.D. 1938.

S. G. Bannam
Barrister, Blairmore, Alberta.
Solicitor for Mrs. Staffie Lysek, Administratrix.

Masonic Lodge Installation

Arthur E. Graham was installed as worshipful master of Summit Lodge A. F. & A. M. last Thursday evening, and supporting officers for 1938 are H. Wilton-Clark, immediate past master; Sidney C. Short, senior warden; R. F. Barnes junior warden; T. Flynn, chaplain; F. McLeod, senior deacon; John Howarth, junior deacon; J. Park, senior steward; A. B. Westworth, junior steward; J. Emmerson, treasurer; W. L. Rippon, director of ceremonies; M. W. Cooke, secretary; H. T. Halliwell, organist; W. S. Purvis, tyler. Ten of the above officers are past masters of Summit Lodge. The installation was conducted by Rt. Wor. Bro. Albert F. Short, P.D.D.G.M. A social hour followed the ceremony.

Shower for Bride-To-Be

On Wednesday, Jan. 12, at the home of Mrs. Frank Vincent in West Coleman, a miscellaneous shower was held in honor of Miss Mary Klish. About twenty guests spent a pleasant evening at whist and bridge, Mrs. James Cousins winning first prize and Mrs. J. Glowacz, the consolation. At 11 o'clock two little girls brought in the presents, and in response Miss Klish made a pretty speech. Shortly before midnight the party broke up, after everyone had wished the bride-to-be the best of luck and happiness.

Seeing ourselves as others see us—some think we are alright; others think we're "lousy," some think we're preaching the gospel; others think we're plain heathens. However, we're doing the best we can, like the "bum" pianist in a travelling orchestra; so don't shoot! Above all, don't "stop the paper."

WORLD HAPPENINGS BRIEFLY TOLD

Hon. John Buchan, 26, eldest son of Lord Tweedsmuir, has come to Canada to join the Edmonton staff of the Hudson's Bay Company.

The Duke of Richmond's castle, six villages and 50,000 acres of land, have been purchased by the crown lands commission "purely as an investment."

A new world record depth of 9,500 feet for diamond drilling has been set near Potchefstroom, in the Southwestern Transvaal. The drill is searching for the main gold-bearing reef.

Because a doctor was seen at dog races in Manchester, the court stepped in. Owing \$225, he was ordered to pay one shilling a month. Now he's clearing off the debt at two shillings a month.

Representing 56 nations, between 2,500 and 3,000 delegates will gather in Durban in 1940 for the World's Sunday school convention, the largest ever to be staged in South Africa.

Seven young persons, all of high school age, were killed in Butler, Indiana, as the automobile in which they were riding crashed through crossing gates into the side of a speeding passenger train.

George Brooks, who fought in the American civil war and in the Great War as well, celebrated his 83rd birthday in Winnipeg, still hale and hearty. He served with the Canadians in France, despite his age of 73 years.

A. H. Scouten, 87, veteran of the Riel Rebellion and Fenian Raids, died in Winnipeg recently. He was born at Kingston, Ont., and came west when young to become one of the first original members of the old Royal Northwest Mounted Police.

Kind Aid Helped Business

Taxi Driver Was Repaid For Be-friending Small Girl

Some months ago, the driver of a taxicab in Los Angeles saw a girl of about six standing on a busy street corner, frightened, bewildered, and crying. He stepped out of his cab and, between the child's sobs, learned that she was on her way home from school and "had got lost." With no thought of payment, he put the girl in his taxi and, using the meagre information she could furnish, took her home. The incident gave the grateful parents an idea. They not only paid the driver generously for his trip, but made arrangements with him to take several children in the family to and from school every day. Now other parents in the neighborhood have made similar arrangements with the same driver.

Game Conservation

Would Set Aside Large Areas For Indian And Eskimo Trappers

In an effort to snatch the Indian from lethargy and hopelessness and at the same time rebuild the fur industry, the Hudson's Bay Company will concentrate on game conservation in the north.

Ralph Parsons, company fur trade commissioner, said the firm would expedite for conservation plans in 1938. "These will include vigorous support for government proposals to set aside large areas for exclusive hunting and trapping privileges of Indians, Eskimos and half-breeds," he said.

May Replace Whistle

Radio For Communication On Freight Trains Is Tested

Trainmen foresee "end-to-end" radio communication on long freights as a substitute for shrieking whistle signals.

The Pennsylvania Railroad tried out the sets on a 30-mile run from Philadelphia to Paoli, Pa., in a 30-car freight, and then announced it hoped eventually to install them throughout the system. The new apparatus consisted of receiving and sending instruments operated similar to a telephone—but without wires.

Proud Yankee—"Yeah, I sure be long to New York."

Englishman—"I'm glad to hear it. I thought it belonged to you."

FLIN FLON

"The Story of Its Finding and Position Today"

By FRATT RUHN

By the time I'd seen all this I'd been some hours underground, but there were still some puzzles for me to answer somehow to myself, so I asked my guide.

"Suppose all electric power were cut off, how would you get out?"

He assured me that there was a ladder system that led to the surface. I know I'd never get up, not with those spots, but I said nothing.

Then how about unexpected falls of rock in runways loosened by constant explosions in the mine proper?

Will the mine safety engineer and his crew do nothing else but examine and mark anything dangerous? They also go over the mine each Sunday and their word is law. No man can work underground if he says conditions are not safe.

Then there's a Provincial safety man who also examines and recommends. Then the chief engineer the mine superintendent, and goodness knows how many other officials are always taking a "look-see" for safety's sake.

My guide and I went up the 1170 in a couple of minutes and emerged on the main floor, where I changed, and noticed that there was hardly a spot on my rubber suit.

Flin Flon is called a "Picture Mine" by mining men, but so splendidly laid out, so clean.

I met Superintendent Caulfield and at first didn't take in just who he was, but later I was told—and how! A young man in his early thirties to be the "chief" in such a mammoth undertaking. But there he was, calm, cool and collected but knowing what he was doing.

Flin Flon is distinctly a mine and town of young people. The silver seemed "big boys" and "big boys," therefore the attitude is one of toleration for each other and no attempt is made to "lord it over the other fellow."

Well, I'd seen the underground where men are employed, at least I'd seen it enough to understand the operation so "will you please take me to the open pit," said I to Chief Engineer Haskie.

It was here, on the edge of the lake, now drained and turned into a sports area, that Tom Creighton made his original find.

What A Hole!

Imagine this if you can, a hole in solid rock 250 deep, 400 feet wide and 1,600 feet long and made by man blasting it out.

The pit has been operated for seven years and will likely be through so far as paying ore is concerned in another 15 months or so, but of course the big mining is now taking place underground, using well-drilling machines to punch holes in the rock, which are then blasted once a week.

At first steam locomotives geared directly on every wheel, pulled the ore, but they stand discarded now for electric locomotives pull two cars at a time on a very steep grade. The photo here gives you some idea of the open pit.

Well, we saw there was to see here and in the distance stood that unique Lake Bottom Golf Club with a few people playing the game, and a couple of hard hats as they would on any other. I'll give you the details about this course later on.

Back then to follow the ore as it came above ground, was carried high to hopper, and dropped down chutes to the first crusher.

Flin Flon ore, by the way, is known as a "Complex" ore, contains less than forty pounds of copper and about seventy pounds of zinc, approximately 0.001% of gold, and slightly better than one ounce of silver per ton of 2,000 pounds. All of these values are in the ore, and are thoroughly permeated with sulphur.

The first crusher it strikes is an enormous one shaped like the pestle and mortar that you see your druggist using to grind drugs.

The sides of the mortar are made of manganese steel and the heavy pestle suspended from the top is protected from the ore falling on it in lumps weighing sometimes hundreds of pounds by an enormous steel jacket.

The bottom of the pestle is rocked from side to side against the walls by concealed machinery, so powerful that though there seems little movement the ore lumps are cracked up quickly and fall by gravity onto travelling belts underneath.

Train tracks above the crusher carry the ore from the open pit. When that is being crushed the ore from the hopper, coming in from the mine all the time, is temporarily shut off.

So exact is this business that by mixing ore from different parts of the mine, and the open pit, the engineers can keep a definite ratio of values between gold, silver, zinc and copper every day.

Required Too Much

British War Minister Gives His Reason For Staying Single

If Mr. Hore-Beith, the British Minister for War, has never married it is that "my cooking requirements are so exacting that I have never been able to find a wife who comes up to the necessary standard."

At any rate, that is what he told army cooks to whom he presented medals at an exhibition of the Cookery School at Aldershot camp a few weeks ago.

Since the World War bully beef has been banished from Thomas Atkins' bill of fare and he gets a dinner that not only is very palatable but adorned with French names as well as bits of greenery. Moreover, it appears, he gets no fewer than fifty kinds of puddings.

Huge Aerial Signpost

More than 150 tons of concrete have been used to make Great Britain's largest signpost—the aerial signpost just completed in the meadows of the Ovaline Dairy Farm at King's Langley, Herts.

The signpost is a circle, 200 feet in diameter, with the words "To Croydon, 27 Miles."

In addition to tropical Asia, bamboo grows up to the snowline of the Andes in South America.

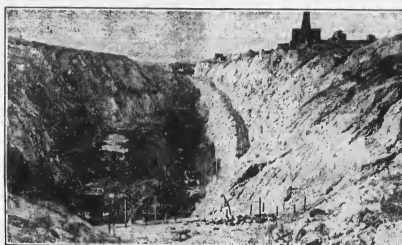

It is useless to be good unless you are good for something. 2237

The main crusher at Flin Flon mine—here all the ore from every source is passed through amid a shower of sparks—and much noise.

150 tons of dynamite in one blast at Open Pit, Flin Flon, Manitoba, in 1933. Operations are much quieter now that the town has grown so large.

The Open Pit. Note the great depth, width and height of this excavation in the solid rock. This is the original mine at Flin Flon, Manitoba.

ermous one shaped like the pestle and mortar that you see your druggist using to grind drugs.

The sides of the mortar are made of manganese steel and the heavy pestle suspended from the top is protected from the ore falling on it in lumps weighing sometimes hundreds of pounds by an enormous steel jacket.

The bottom of the pestle is rocked from side to side against the walls by concealed machinery, so powerful that though there seems little movement the ore lumps are cracked up quickly and fall by gravity onto travelling belts underneath.

Train tracks above the crusher carry the ore from the open pit. When that is being crushed the ore from the hopper, coming in from the mine all the time, is temporarily shut off.

So exact is this business that by mixing ore from different parts of the mine, and the open pit, the engineers can keep a definite ratio of values between gold, silver, zinc and copper every day.

Knew How To Spend

Merchants Of London Regret De-parture Of Mohammedan Ruler

Merchants of London are mourning the departure of the great spender to visit the city in years. He is the handsome Nawab of Bahawalpur, ruler of 1,000,000 Punjab Mohammedans. Twenty men worked three hours to load the Nawab's 50 tons of baggage. There were 100 cases, 10 crates, 17 packages, five bags, a cask and two bales. The Nawab also took home a limousine with gold fittings and a safe for his palace. It is estimated that he spent about \$150,000 during his visit to England. He is said to have spent hundreds of dollars on clothes for himself and for special uniforms for his servants. Other purchases included gold plated radio sets, grand pianos, a collapsible boat, and pieces of modern furniture.

Two Pioneers

Two pioneers in the introduction of fingerprints for identification purposes were Sir Francis Galton of England and Sir William Herschel of India. Herschel wanted to fingerprint members of the Bengal courts, while Galton wanted to do the same for Chinese immigrants.

The dock at Southampton, England, is the largest in the world and is capable of berthing eight of the world's largest vessels at the same time.

Speaks Four Languages

And Polish Girl Plans To Master A Few More

Irene Propheta, an 18-year-old freshman at Hunter College in New York, who went to the United States three years ago from Poland, will find little difficulty in making herself understood wherever she goes after graduation, the college authorities discovered.

Miss Propheta speaks Polish, Ukrainian, Czech and English, understands Russian, and is planning to master several other languages during her college career. Despite the brief time that she has been in America, Miss Propheta was graduated with honors last June from Theodore Roosevelt High School. She earns her lodging by doing housework for the sisters of Our Lady's Institute, the Bronx, with whom she lives.

Cork From Potato Peel

According to Dr. Hans Mayer, director of the Research Institute in Berlin, the time is not far distant when people will walk on potato peel, and also use it to stop up wine and other bottles. Dr. Mayer is a "subtitled" expert. His latest discovery is a special chemical treatment of potatoes by which their peel is turned into a material which has acquired the natural qualities of cork.

Giving in doesn't necessarily mean giving up.

SUNDAY SCHOOL LESSON JANUARY 16

BEGINNING A LIFE OF SERVICE

Golden text: The time is fulfilled, and the kingdom of God is at hand; repent ye, and believe in the gospel. Mark 1:15.

Lesson: Mark 1:14-28.
Devotional reading: Isaiah 11:1-9.

Explanations And Comments

Jesus Preaches in Galilee, Mark 1:14, 15. Now after John was delivered up, Jesus came into Galilee. Mark assumes here a knowledge of the Baptist's arrest and imprisonment by Herod, but later on (6:14-29) he records his fate. When John's ministry was over, Jesus began his own. He came preaching the gospel (of glad tidings, R. V. N.) of God, saying, The time is fulfilled, and the Kingdom of God is at hand—the world is now ready for the new order of things.

With the announcement that the Kingdom was at hand, Jesus issued a call to repentance and to belief in the good news. The way of entrance into the blessings that the day of the Lord may bring is a way of moral change of mind and heart and of the spirit.

The gospel brings its obligations. It raises new moral standards. Four Men Called to Discipleship, Mark 1:16-20. The call came to him whom he would" (Mark 3:13), or as Moffatt translates. He summoned the men he wanted. The first he called two brothers, fishermen, all to personal companionship with him, that he might teach them. "Come ye after me, and I will make you to become fishers of men," he told them. "The fisherman Peter did not say assie his nets but changed them" (Augustine). Jesus' ministry was an itinerant one; he went about from place to place preaching and healing.

The nature of his work made the fellowship and apprenticeship of disciples necessary. The prophets had had their scholars and the scribes had their schools, it was a long established custom. But the need of a training school was never such as now. Jesus had many things to say to his people, and the only trained hearers could fathom, many things to do that only loyal pupils could undertake, a legacy of service to leave them that only skilled followers could carry out. Straightway they left the nets and followed him. The wonderful impelling power of Jesus is here seen.

A little farther on Jesus saw two other brothers, James and John, busy at mending nets, and then he called also. They, too, left their occupation once and went after him, leaving their father Zebedee in the boat with the hired servants.

He who would decide, as these men did, to follow Jesus Christ, to live the truth that he taught, to accept of the way which rules his life, has indeed set himself a task that would be hopeless were he thinking of carrying it through of his own sufficiency.

There is always plenty of warning about lip and mouth cancer. The early signs are white or pearly spots on lips, tongue or inside the mouth. Raw sores which show no sign of healing, warty lumps inside the cheek and so on. The aforementioned signs may be observed by anyone. The lamentable fact is that such signs are frequently ignored until the cancer which follows is beyond relief.

A friend of the writer, a man of more than ordinary intelligence and education, had a sore on his lower lip. He was an inveterate smoker. I said to him, "What are you doing for that sore on your lip?" "Oh," he replied, "I got a salve from the druggist. It'll be all right." I demurred at this sort of treatment. "You don't think it's a cancer do you?" asked my friend. "No," I answered, "but it soon will be if you fail to give it better treatment."

After a good deal of persuasion I was able to induce this man to have the proper treatment, viz: the use of radium, and it is a matter for congratulation that, after 10 years, there has been no return of the sore.

Next article: Cancer of the Skin.

STITCH UP SLIMMING COAT-
FROCK IN A COLOURFUL
FASHION

By Anne Adams

Well, I followed that travelling butt, and how I followed it! First, as it came out from under the crusher it carried an even layer of ore cracked to about four or five pounds in the larger sizes, plus all the small stuff.

At the lower end of the belt stood a man with heavy gloves on and with nose and mouth masks and glasses to protect him from the dust. His job was to pull off the belt any heavy metal (broken drills, etc.) Pieces of timber from the blinding.

Then the belt started to climb a steep ascent, and twenty feet up there was an immense round pulley of metal suspended six inches above the belt and highly magnetized, which pulled out of the ore many pieces of wire and anything metallic the man below could not see or grasp. Every now and then this magnet was swung to one side, the current cut off, and the metal dropped in a scap heap.

No room for some pictures this week—you'll see them in next issue.

And Polish Girl Plans To Master A Few More

Irene Propheta, an 18-year-old freshman at Hunter College in New York, who went to the United States three years ago from Poland, will find little difficulty in making herself understood wherever she goes after graduation, the college authorities discovered.

Miss Propheta speaks Polish, Ukrainian, Czech and English, understands Russian, and is planning to master several other languages during her college career. Despite the brief time that she has been in America, Miss Propheta was graduated with honors last June from Theodore Roosevelt High School. She earns her lodging by doing housework for the sisters of Our Lady's Institute, the Bronx, with whom she lives.

A busy day of household chores can be just such a comfy and good-looking comfort as this. You can depend on its graceful panels to make you look ever so much taller and slimmer, while deep, pointed collar, brief sleeves, party belt, and handy patch pockets sum up the rest of your outfit. For a specialty cheery effect, make Pattern 4681 of a crisp, printed percale, figured chambray, or cotton broadcloth, and add a dash of contrasting ric-rac to empire collar, sleeves and pockets. Even inexperienced seamstresses will find this frock simple to sew.

Pattern 4681 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 4½ yards 36 inch fabric and 1½ yards ric-rac. Illustration shows sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly: Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 176 McDermott Ave. E., Winnipeg.

Giving in doesn't necessarily mean giving up.

Health LEAGUE OF CANADA presents TOPICS OF VITAL INTEREST by DR. J. W. S. McCULLOUGH

ARTICLE No. 23

Cancer Of Lip And Mouth

There is an old French proverb which says: "Death enters by the mouth." It is eminently true. The mouth is about the dirtiest cavity in the body. It harbours germs of disease without number and, while a cancer is not the result of germ action, conditions in one's mouth favour the incidence of cancer in that area.

Infection of teeth, of tonsils, of the base of the tongue, the condition known as pyorrhea, ill-fitting dental plates, the irritation of a broken tooth and general uncleanness of the teeth, all contribute to cancer. A person predisposed to that affection. So too, do excessive use of tobacco, and syphilis. Cancer of the floor of the mouth or inside of the cheek is frequently due to bad teeth, tobacco, and syphilis. Women have less cancer of the mouth than men for the reason that women keep their teeth cleaner than men do and besides women until recently smoked less than men. The next 20 years of the prevailing tobacco habits of women may tell a different story.

The influence of chronic irritation in causing cancer of the mouth is well illustrated by the betel-nut chews of Eastern lands. Cancer of the mouth in women of this country exists to the extent of about 110th of one per cent. This incidence in Ceylon is 13% and in the Philippines 25%. The reason is said to be the irritation produced by the habit of betel-nut chewing among women of these countries.

There is always plenty of warning about lip and mouth cancer. The early signs are white or pearly spots on lips, tongue or inside the mouth. Raw sores which show no sign of healing, warty lumps inside the cheek and so on. The aforementioned signs may be observed by anyone. The lamentable fact is that such signs are frequently ignored until the cancer which follows is beyond relief.

A friend of the writer, a man of more than ordinary intelligence and education, had a sore on his lower lip. He was an inveterate smoker. I said to him, "What are you doing for that sore on your lip?" "Oh," he replied, "I got a salve from the druggist. It'll be all right." I demurred at this sort of treatment. "You don't think it's a cancer do you?" asked my friend. "No," I answered, "but it soon will be if you fail to give it better treatment."

After a good deal of persuasion I was able to induce this man to have the proper treatment, viz: the use of radium, and it is a matter for congratulation that, after 10 years, there has been no return of the sore.

Playing Chess By Mail

Depression Years Have Caused Interest To Be Taken In The Game In The West

Depression years caused a boom in chess playing. Thousands in Canada, United States and other countries gave their spare time to a game they found mentally exhilarating and inexpensive.

Saskatchewan has more chess players per capita than any other province in Canada, where, best of youngsters could not be absorbed by industry, more than 7,000 boys under 16 years of age have become competent chess players under the tutelage of service clubs and their agents aiding underprivileged youth.

In Western Canada 1,000 chess players' moves of them isolated on farms, have been playing a series of games with 1,000 United States players for seven months. The competition, arranged by H. W. Jordan, Hochelaga street west, Moose Jaw, Sask., has attracted so many chess players that two tournament games with an American.

In addition to arranging and playing in the tournament, Mr. Jordan, a court reporter, has been playing 1,000 games by correspondence with other western Canadians.

When a cold strikes . . .
don't take needless risks

Treat Colds This PROVED Way

WHY experiment? Vicks VapoRub has been doubly proved for you . . . proved by everyday use in more homes than any other medication of its kind; further proved by the largest clinical tests ever made on colds. (See full details in each VapoRub package.) Only Vicks gives you such proof.

VapoRub is the direct external treatment. No "dosage"—no risk of stomach upset, chest, and back (as illustrated). Relief starts almost at once. You begin to feel warm and comfort-

able as VapoRub starts working deep through the skin like a poultice. At the same time, its medicinal vapors—released by the warmth of the body—are carried deep to the throat and air-passages with every breath.

This double action loosens phlegm—relieves irritation and coughing—helps break local congestion—keeps throat open.

Repeat treatment at bedtime. After restful sleep comes VapoRub keeps right on working, hour after hour, often.

Now WHITE-STAINLESS—

VAPORUB**

WHAT HO!

By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER IV.—Continued

"Talking of taking turkey, said the Earl, 'though I'm sure you and not goose or gander can't think, I'm going to tell you how happy it makes me that you, a veritable Bingley, are going to have the castle. It's never been out of the family since it was built, except for a few times when enemies seized it, but we checked them out in two ticks, you can depend upon that. Since, at lunch, we established that you and I both come from the same litter, I know that I am leaving the castle in safe hands.'

Ernest wrestled with this statement, and was thrown. Since the Earl had had but a single minute's glass of claret with his lunch it was unlikely that he was drunk; but, if sober, could he, so quickly, be called 'sane'? For, apparently, his words meant anything, he was now offering to give the castle to Ernest. It seemed to Ernest that his most prudent policy was to say nothing, agree to everything and be on the alert to make a dash for the door if his lordship grew violent. So he bowed, and a bow can mean much, or nothing.

"A thousand pounds," remarked the Earl, "is a lot of money."

"Indeed it is, sir," agreed Ernest, "nearly five thousand dollars."

"A lot to me, I mean to say," went on the Earl. "But I darsay to a millionaire it is only a handful of pence."

"To some rich men I suppose it is," agreed Ernest.

"Just a spot on an old wicket," said Ernest.

"No doubt," said Ernest.

"I guess so," said Ernest.

"Now look at this historic pile, as the guide book calls it," said the Earl. "Look at this room. My study they call it though I never study anything here. Or elsewhere. In this very room, Mr. Bingley, a duke wrote love-letters which got him into boshes of trouble; a royalist plot was hatched here; a certain piece of the blood got so tight, sitting right where you are, with my grandpa, that they went out and jumped into the moat under the impression that they were frogs. And so it goes. Every cubic inch of this room is piled from the top stone on the tower to the dungeons is fruitful with memories."

Ernest nodded.

"I know," he said.

not conjecture how the Earl, always assuming he was sane, could have arrived at so fantastic a misconception of Ernest's financial status.

"The simple turkey is that, meaning us, are in a jam or the jam however one puts it," the Earl said. "Circumstances, chiefly my own under-achievement, have put us on the spot, and I don't mean maybe."

"I won't fatigue you with all the ghoul details, but it boils down to this: We must raise a thousand quid by renting the castle or else—"

"Or else what?" said Ernest, hollowly.

"Steps will be taken," said the Earl, "Meaning that self-same daughter will be booted out into the blizzard. You see Mr. Bingley, there are in London certain rogues who have cast greedy eyes on the castle and will nibble it like a cheese, if they get the chance. Why, I've even heard rumors they think of turning it into a summer hotel! Imagine Bingley Castle full of trippers at five and six, bed and breakfast, and don't feed or annoy the ghost!"

The Earl shuddered.

"Now," he continued, "with the thousand pounds you so generously agree to pay as rent we can hold off those rodents—for a while, anyhow. Your providential coming will give us a breather, and enable us to rally our forces, if any, and patch up the rat-holes, perhaps. No wonder I left you fairly boo-hoing with sheer Rosa fairly boohooing with sheer Rosa. Seems to think you're the answer to the maiden's prayer. She said, 'I'm so glad that our millionaire turned out to be such a charming young man.' Her very words, I said. 'Man, my dear, He's mamma.' She said, 'You won't bid' for me, a millionaire. I took issue with him, and for once, I was right. I pointed out that most, if not all, Americans are eccentric, and millionaires invariably are. No please don't take umbrage at the situation. Once back in the States, I've been called that myself. Well, if it means doing what amuses you and telling Mrs. Grundy to go and pluck a pigeon, I'm glad I'm eccentric. Everybody who is at all interesting is a bit off-centre, I always say. Right?"

Ernest nodded miserably.

"I said," pursued the Earl, "that a millionaire can ride a ludicrous horse, or a bison or a tiger—if it entertains him to do so. Besides, I reminded Crump, there was something symbolic in the situation. Once back in the States, I've been called that myself. Well, if it means doing what amuses you and telling Mrs. Grundy to go and pluck a pigeon, I'm glad I'm eccentric. Everybody who is at all interesting is a bit off-centre, I always say. Right?"

Ernest nodded miserably.

Besides, I reminded Crump, there was something symbolic in the situation. Once back in the States, I've been called that myself. Well, if it means doing what amuses you and telling Mrs. Grundy to go and pluck a pigeon, I'm glad I'm eccentric. Everybody who is at all interesting is a bit off-centre, I always say. Right?"

word had been dipped in acid and burned his throat.

"How come?" said the Earl.

"I'm not what I seem to be?" Ernest said.

"Nobody is," said the Earl.

"I mean," said Ernest, in the same measured and tortured tones, "I have not agreed to rent the castle."

A stricken look aged the Earl. He tried to smile, but could not. He tried to adopt a light tone, but failed.

"Oh, I say, now," he said, "I thought it was all understood."

"I am to blame," said Ernest. "I did not understand."

There was a knock at the study door.

"May I come in?" said Lady Rosa a voice.

"Not now, dear," said the Earl.

She came in anyhow.

"Well, everything rosy?" she began, then, seeing their faces, asked quickly, "Why, what's the matter?"

"Everything," said the Earl.

"Can't you arrange terms?" she asked.

"I seem to have flubbed my shot again," said the Earl, brookingly. "Mr. Bingley has changed his mind about taking the castle."

She turned toward Ernest.

"Have you?" she said.

Ernest looked back at her, saw her distracted eyes.

"Will you give me a moment to think?" he said, huskily.

"Certainly."

He walked to the window and stood looking out at the gray—and, it was on which the autumn sun was falling.

"Shall we leave you alone?" he heard Rosa Bingley say.

"No. Please stay."

For a minute he stood there, thinking.

Suddenly he wheeled around and faced the Earl of Bingley and his daughter.

"I've changed my mind again," he said. "I'll stay."

"You're quite sure you want to?" asked Rosa.

"I never wanted anything more in my life," said Ernest. He held out his hand to the Earl.

"It's a bargain," said Ernest. The Earl took his hand.

"Good-bye, Doakley," he said.

"I'm glad you've decided to stay," Rosa said.

"We can buzz right out tonight, can't we, Rosa?" asked the Earl.

"Yes."

"You don't have to go," said Ernest.

"I beg your pardon?"

"I mean," said Ernest, "I'd like it very much if you'd stay. There's just me, and all I'll be doing is studying the castle, and one room off in a corner somewhere will be all I'll need. Will you stay, sir?"

(To Be Continued)

Passing Of The Shin-Plaster

Many Will Regret If This Handy Cure Is Lost To Disappear

Whoever was responsible for the order to exterminate the Canadian shin-plaster could not have had little nephews and nieces to whom these tiny slips of paper were treasure-trove in a letter from Uncle. The Canadian 25-cent bill may have been a nuisance to bank clerks who had to account for them, bundle them up and otherwise play nursemaid to them. But they were a convenience to many who wished to send 25 or 50 cents through the mail and did not wish to be bothered with money orders or postal notes. Certainly children loved them! Listen to the lament of the Ottawa newspaper, Le Droit:

"They were liked, those handy little slips; they were liked by all those who have at the doors of their hearts little strings of little girls and of nephews, and particularly adorable grandchildren. When grandfathers felt his pen shaking too much a little 25-cent bill slipped into an envelope playing a diplomatic role of great importance. Uncles and godfathers and godmothers used them, too; they sent happiness without much cost under the smiling portraits of the Gracious Majesties reigning over the United Kingdom and the Dominions beyond the seas."

The shin-plaster, so called because it was about the size of the plaster that once was a common household remedy, has been seen less frequently in recent years. Perhaps the Bank of Canada felt it was only speeding a departing guest when it "called in" these unique little money tokens. Edmonton Journal.

"Was there any shade in the desert?"

"Yes, but I couldn't get in it."

"Why not?"

"Have you ever tried to sit in your own shadow?"

England may subsidize the building of houses, to rent at not more than 75 cents a week, for farm workers.

Experts know of about 1,600 different varieties of apples.

In Defence Of Advertising

One Of The Greatest Educational Forces Of Our Modern Civilization

When I hear people criticizing the amount of advertising in their newspapers and magazines—or over their radio—it always strikes me as a completely selfish attitude. What chance have our newspapers? What would it be like if we lived in a world without advertising? How would we learn of new products, new services available to us—new discoveries? Our whole interest in life would quickly shrink until we were, in effect, living in a small, restricted community without those essential contacts with the outside world. If the money spent in advertising were refunded to the purchasers with each purchase, there is no coin small enough to take care of the transaction.

Simply to leave us to do as buyers is to give a courteous hearing to those manufacturers who, through their advertising, give us a reliable guide to safer buying—and at the same time furnish the money which brings us our newspapers, magazines, radio programmes, and the livelihood of every one of us depends on the movement of goods and the exchange of products and services each with the other.

Advertising has done more to stimulate buying than any other factor. When we buy advertised products, we know that we are dealing with a business with manufacturers who are willing to stand back of what they sell. By making statements in writing and signing his name to those statements, a manufacturer gives a written guarantee of his honesty, and the reliability of his goods. Misstatements in advertising are a legal offense and open to prosecution.

In those countries where advertising flourishes (Canada and the United States principally) we find people with higher standards of living. We find more intellectual people—people with more time to do the things that make life more enjoyable. We find more improved products given to us through advertising.

Advertising has done a great deal (more than any other force) to increase production, and has brought about a consequent reduction in prices. Automobiles are a case in point. Fifteen years ago they cost twice as much—and yet to-day they are infinitely cheaper and more reliable. Cameras when they first came on the market sold for \$40 and the latest \$40 camera buys very good ones around \$10 and less, with films costing \$30 to develop. Electric light bulbs to-day give twice as much light for the money.

Life insurance companies are giving us better and more information which help us toward healthier living—and at the same time enabling us to acquire an estate on small weekly or monthly payments. Food manufacturers have model kitchens so that they may give us new and better ideas. Manufacturers of soap products, polishes, etc., are perfecting products which cut down on manual labor and do a better job at the same time.

Advertising makes good available to us—it's a standard quality and a standard price—whether we live in a hamlet or the largest metropolis. The art of advertising is small indeed compared with the disclosures which could be made of firms and products where there is no advertising, and no written guarantee that we are even getting what we pay for. In countries where advertising is unknown, the people are ignorant and it is a case of "Let the Buyer Beware."

Let advertising have taken the guess out of buying. We know that advertised products have to live up to high standards of quality. And in buying advertised brands, we are doing business right out in the open with firms that are reliable and ready to substantiate all the claims made for the products they sell.

So let us appreciate advertising for what it is—the biggest educational force in our modern civilization.—From Marketing.

Rations For Poultry

Ground Alfalfa Hay Will Add Vitamins To Mash

Grinding leafy alfalfa hay, which has been well-cured with a modern type feed mill, is an efficient way to add vitamins A and G to the poultry mash. Both are essential for good health and flock, high hatchability and normal growth according to Prof. L. F. Payne, poultry specialist at Kansas State College. Feeding loose hay in the racks is wasteful compared with adding ground alfalfa to the mash mixture at the rate of 10 per cent. of the total ingredients.

Skating Stars From Canada

Young Daughters Of R.C. Gergymen Have Skated Before Queens

It's a far cry from the frozen surface of a British Columbia lake to the spotlight of Covent Garden Opera House, London, but that's what Lovett and Joy McKinnon have accomplished in a few short years.

Daughters of a British Columbia clergyman, the young girls are skating stars extraordinary, and are at present on an expedition tour of Great Britain. They had the honor recently of skating before Queen Elizabeth, and the for ballet in which they appear have been visited by other members of the British royal family, and by the King and Queen of Bulgaria.

Both sisters were born in Vancouver, and attended Kildonan high school there. They were still at school when they were engaged for the Coronation Ice Revue at Brighton, England.

After joining the Coronation Ice Revue at Brighton the girls spent several months in skating exhibitions in all parts of England. Recently they were starred along with some of Europe's greatest skaters in London. The sisters were entrusted with special acrobatic numbers in "Enchanted Night," and won enthusiastic applause by their perfect teamwork—Toronto Star Weekly.

A Valuable Food

But Doctors Have Changed Their Minds About Spinach

Spinach, since it is unpleasant and therefore regarded as nutritious, was long overrated as a food source of Vitamin A (good for eyes), Vitamin C (good against infectious diseases and scurvy), iron (good for blood) and calcium (good for bones). Hence it is sold (frozen, frozen, steamed and canned, dried, powdered, and powdered and compressed into tablets. Discussion of its merits has gone so far that the American Medical Association's Council on Foods decided to rejudge this best studied of all edible leaves.

The Council on Foods reported its matured findings thus: "Spinach may be regarded as a rich source of Vitamin A and as a contributor of Vitamin C, iron and roughage to the diet. It is therefore a valuable food. (But) the iron is not well utilized by infants . . . (and) the feeding of spinach is of no value during early infancy as a source of calcium."

Limiting Auto Speeds

Important Aspect Of Highway Safety Problem

The chief trouble with automobile traffic these days is that the automotive engineer has gone too far ahead of the highway engineer—to say nothing of the average driver. So says J. M. Gentry, an American safety commissioner, in a plea for a national agreement among automobile manufacturers to limit car speed to 70 miles an hour.

As things stand, Mr. Gentry points out, the average auto will go much faster than the average road can safely accommodate it, and also much faster than the average driver can safely guide it. A speed much above 60 miles an hour should be entrusted only to highly qualified motorists and confined to specially designed and built roads.

Whether such an agreement as he suggests can ever be obtained is, perhaps, doubtful. But his proposal does touch on one of the most important aspects of the highway safety problem.—Victoria Times.

Showed Great Endurance

After being buried in snow for 37 days four ewes were rescued in Skiddaw Forest near Cumberland, England. They speedily recovered and may be honored for holding the sheep endurance record for being in snow and surviving. They are owned by Lord Leconfield.

Must Observe Custom

Afternoon pants shirred by men of the French Foreign Legion are at the risk of a week in prison. Orders are that the siesta custom must be observed; any soldier evading the nap may be clapped into prison.

2-WAY RELIEF FOR THE MISERY OF COLDS

Take 2 "ASPIRIN" tablets and drink a full glass of water. Repeat treatment in 2 hours.

If throat is sore from the cold, crush and add 2 "ASPIRIN" tablets in ½ glass of water. Gargle twice. This eases throat ravages and soothes almost instantly.

No family need neglect even minor head colds.

Here is what to do: Take two "ASPIRIN" tablets when you feel a cold coming on—with a full glass of water. The repeat, if necessary, according to directions in each package. Relief comes rapidly.

The "Aspirin" method of relieving colds is the way many doctors approve. You take "Aspirin" for relief—then if you are not improved promptly, you call the family doctor.

* "Aspirin" tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

Little Helps For This Week

Hast Thou not known? has thou not heard, that the everlasting God, the Lord, the Creator of the ends of the earth, fainteth not nor is weary? Isaiah 40:28.

Workmen of God, O lose not heart. But learn what He is like; And in the darkest battlefield, Thou shalt know where to strike.

The mystery of the Infinite is one which through all the ages we shall only be able to read a line of here and there. We already know that the name of the Infinite is God. We are as soldiers fighting in a foreign land that understand not the plan of campaign, and have no what is at our hand to be done. Let us do it with submission, with courage and with a heroic joy. Behind each one of us lie six thousand years of human effort, human conquest; before us is the boundless time which has opportunities yet unexplored, and which we have to create and conquer with the help of God—

How Prices Are Fixed

If Secrecy Desired Finger Code Is Used Under Cover

Among at least three quarters of the people of the world, goods bought and sold seldom have a fixed value. The price paid is determined only after negotiations between buyer and seller. When the parties wish to keep the price a secret, the negotiations are carried on in a finger code under cover. Prices for rugs in Persia and rubies in Burma are settled by the two men squeezing each other's hands beneath a table or a piece of cloth.—Colliers.

Most Observe Custom

Mixed Farming

IT IS EASY to talk about mixed farming, but not always easy to achieve it. Western farmers know that some land is better for growing wheat alone. Even in a drought year it is better to have wheat land with no wheat than pasture land with no pasture. The wheat can wait until next year, but the stock cannot.

STILL, if one thinks of Canada as a single large farm area, it is plain to be seen there is an advantage in having many different kinds of crops coming along. It is not likely that they will all fail at the same time. There may be fruit in British Columbia or maple syrup in Quebec, even if New Brunswick potatoes fail. Similarly, butter may be churned on the Prairies, even if Ontario creameries have a bad year. In these diversified efforts lies a great part of our strength as a nation.

THOSE of us who work in factories instead of fields like to think that we are part of this diversified effort. The things we make—cotton goods, for instance—are needed. So we keep on producing crops of cotton goods, feeling that we are part of the Canadian plan of mixed production. Like the grain farmer, we contribute to the welfare of the whole country. That is the advantage of a diversified agriculture and a diversified manufacturing industry—when some of us suffer bad years, the others are on hand to keep things going.

Bellevue Bakery

Phone 74w, Bellevue J. Shields, Local Dealer

A number of Blairmore merchants rubbed their eyes in amazement this week and wondered if their eyes were playing them tricks as they gazed at a smiling young man who handed them cheques. The young man was Alik Tiber, secretary of Blairmore hockey club, who was

paying off part of the club's \$400 debt incurred in past years. Even the Journal shared in this new found wealth. A dance sponsored by the club during the holiday season brought a fair profit and the club decided to pay off its debt as much as funds would allow.

Local News

Mrs. Florence Smith left Tuesday on a three month's visit to Ontario.

Latest reports regarding John Lochrie, who is at Mayo hospital, Rochester, state that since arriving there he has been fitted with a back-rest and is responding to treatment.

Three Coleman curling rinks motored to Blairmore on Sunday evening and were trimmed two matches to one by three opposing Blairmore rinks. Destob's rink won for the locals, Kerr and D'Appolonia suffering defeat.

Mrs. C. D. Rogers was hostess to a number of friends at a bridge party on Friday evening. Prize winners were Mrs. Jack Rogers, first; Mrs. J. Kinner, second, and Mrs. Westworth as consolation. Travelling prize was won by Mrs. A. Beveridge. Four tables were in play.

Frank Paterson suffered an attack of illness at the hockey game Tuesday evening and had to be assisted to his home where he was given medical attention. He has been relieved of his caretaking duties at Cameron school by Wm. Antrobus.

This is a liberty-loving country, and any curtailment of privileges or attempts at dictatorship will be stoutly turned aside. Alberta will remain a part of Canada, and Confederation, despite the wild talk of the past two and a half years.

To raise funds the First Catholic Slovak Jednota, Lodge 513, is holding a grand charity drawing for a gold watch. The tickets cost from 1c to 15c, and already many have been purchased. Buy a ticket now from Steve Leosky or other members of the committee.

The final of the consolation event in the new year's bonspiel was played Sunday between Ledieu and Bonne. Ledieu's rink showed superior skill and won rather easily by a 16-11 score. Bonne gained five points on the twelfth end to increase his score. Prizes were colored pictures of views taken around Crows Nest Lake and mountain.

Nazarene Mission

An old time gospel mission on Main street, west. Missionaries: C. Helen Mooshian and Gunnell Berglund.

Sunday services: Morning worship at 11.00. Evening evangelistic service at 7.30. Special music.

Week-day services: Tuesday evening at 7.30, prayer, praise and testimony meeting. Friday evening at 7.30: Gospel service with Bible study. To-night there will be a special program, a sermon in song, entitled, "Tell me the old, old story." You will enjoy this service.

A special week-end revival meeting will be featured on Jan. 15, 16 and 17, with Rev. D. Swarth
